FPV Live Release Notes

Date: 18.03.2022

FPV Live firmware: v1.0.1

FPV Live Installer (Windows 10):   v1.0.3

What's new?

- Now the Raspberry records the DVR on the Raspberry micro SD card while simultaneously streaming the video feed via HDMI.

- New background

Notice:

This version may contain bugs.

If recording the DVRs is not essential I recommend to use the fw v1.0.0 which has been tested for longer and is more stable :)
